ART UNIT

PAPER NUMBER

2151

MAIL DATE

DELIVERY MODE

09/22/2008

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/739,844	Applicant(s) BONEFAS ET AL.	
	Examiner HASSAN PHILLIPS	Art Unit 2151	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on 30 June 2008.

2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) ☒ Claim(s) 19, 21-24, 26-29 and 31-33 is/are pending in the application.

 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) ☐ Claim(s) _____ is/are allowed.

6) ☒ Claim(s) 19, 21-24, 26-29 and 31-33 is/are rejected.

7) ☐ Claim(s) _____ is/are objected to.

8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) ☐ All b) ☐ Some * c) ☐ None of:

1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)

2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 8/21/08; 6/30/08

4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____

5) ☐ Notice of Informal Patent Application

6) ☐ Other: _____

DETAILED ACTION

1. This action is in response to communications filed June 30, 2008.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 4, 2008 has been entered.

Information Disclosure Statement

3. The information disclosure statements filed August 21, 2008, and June 30, 2008, have been received and considered by the examiner.

Response to Arguments

4. Applicant's arguments with respect to claims 19, 21-24, 26-29, and 31-33 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 19, 21-24, 26-29, and 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanno, J.P. Patent Pub. No. 10307782A, in view of Oehrke et al. (hereinafter Oehrke), U.S. Patent No. 7,047,300.

7. In considering claims 19, 24, and 29, Tanno discloses a message router (i.e. management server) for routing a message between a server (1) and a protocol gateway (i.e. 2A-2N), the message router comprising: a load balancer module (i.e. 42) to determine a least recently used protocol gateway supporting a protocol of said source of said message, (see abstract); and routing said message to said determined least recently used protocol gateway, (see abstract).

Although the teachings of Tanno disclose substantial features of applicant's claimed invention, they fail to expressly disclose: an authenticator to authenticate that a particular source of a message is an authorized user of a messaging network, said authenticator authenticating said particular source of said message before said message is routed by said message router.

Nevertheless, an authenticator to authenticate that a particular source of a message is an authorized user of a messaging network, said authenticator authenticating said particular source of said message before said message is routed by said message router was well known in the art at the time of the present invention. This

is evidenced in the analogous teachings of Oehrke, where Oehrke discloses an authenticator to authenticate that a particular source of a message (i.e. user from company A) is an authorized user of a messaging network, said authenticator authenticating said particular source of said message before said message is routed by said message router, (col. 7, lines 56-60, col. 8, lines 4-9, 38-40, and col. 9, lines 19-41).

Thus, given the teachings of Oehrke, it would have been obvious to a person of ordinary skill to modify the teachings of Tanno to expressly disclose an authenticator to authenticate that a particular source of a message is an authorized user of a messaging network, said authenticator authenticating said particular source of said message before said message is routed by said message router. As was known in the art, this would have advantageously protected the messaging network by only allowing authorized users to access the network, (Oehrke, col. 9, lines 19-41).

8. In considering claims 21, 26, and 31, Tanno further discloses a router (i.e. 2A-2N) as a least recently used message router, (see abstract).

Although the teachings of Tanno disclose substantial features of applicant's claimed invention, they fail to expressly disclose: said message router/server (i.e. management server/main server 1) is a least recently used message router/server.

Nevertheless, it would have been obvious to one of ordinary skill in the art to modify the teachings of Tanno to disclose said message router/server (i.e. management server/main server 1) also as a least recently used message router (i.e. 2A-2N). As

was known in the art, doing so would have further ensured efficient continuous communication between client and server, (Tanno, abstract), and also would have provided scaling of the message router/server and thus fault tolerance, (also see Oehrke, col. 5, lines 47-51).

9. In considering claims 22, 27, and 32, Oehrke discloses said message router routes said message to a most specific server corresponding to a message key, (col. 9, lines 19-41). One of ordinary skill in the art would combine the teachings of Tanno with Oehrke for reasons indicated in considering claims 19, 24, and 29.

10. In considering claims 23, 28, and 33, Tanno discloses said message router routes said message based on a content of said message (i.e. request for a gateway connection), (see abstract).

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HASSAN PHILLIPS whose telephone number is (571)272-3940. The examiner can normally be reached on Mon-Fri (8am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee can be reached on 571-272-3964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
